WORK AND RELATED EXPERIENCE

Infamous PR	Full Stack Developer (Contract)	June 2017 - Present
Full Stack Contract Developer for Infamous PR, tasked with building a new company website from scratch. Will handle UI/UX design, front end, back end, and 3rd party integrations. Utilizing the MERN stack and deploying using AWS.		
DataLA	Full Stack Developer (Contract)	Feb 2017 - Present
Full Stack Contract Developer at DataLA, City of Los Angeles Web Development. Currently developing an ETL pipeline website with a team to improve efficiency of data querying for employees of the House + Community Investment Department. Technologies: Node.js, Express, PostgreSQL, Data Streams, Sequelize, HandlebarsJS, Babel, Javascript.		
SueYa Inc. (project name: EvictYa)	Front End Developer (Contract)	Dec 2016 - Jan 2017
Front End Contract Developer at the start-up Evict-Ya. Handled UI/UX design for admin / user profile pages utilizing advanced HTML, CSS, EJS, Javascript, and jQuery. Applied coding knowledge in a professional setting with tight deadlines, mastered a healthy Git workflow, and produced clean production level code.		
Infamous PR	Senior Publicist	May 2013 - Oct 2016
Music publicist at start-up. Responsible for handling all aspects of multiple client campaigns from business proposal through media outlet coverage. Developed strong project management skills by managing a small team of interns, intense work ethic, robot-like organization, sharp communication skills, and thick skin. Assisted in growing the business by bringing in multiple clients and forging new relationships still used at the company today. Updated all organizational systems for keeping track of clients, assets, contacts, and daily tasks to increase efficiency.		
USC Bookstore	Customer Service Rep	May 2012 - May 2013
ON Semiconductor	Mechanical Engineering Intern	Summer 2010
U-Haul	Customer Service Rep	Summer 2009, 2011

PROJECTS

TrainBot ([Github](https://github.com)) - JavaScript | Passport.js | Handlebars | Node.js | Express | Sequelize | HTML5 | CSS3
A business website template for personal trainers, allowing them to keep track of clients and disperse workout program information to user over the web. Over a one-week period I was responsible for UI/UX design. Assisted in the implementation of Passport login authentication, MySQL database using Sequelize ORM, and deployment to Heroku. Short deadline tested coding ability under pressure.

MoveTo ([Github](https://github.com)) - JavaScript | jQuery | Node.js | Express | Firebase | HTML5 | CSS3 | MDL | Various APIs
A web app that allows users to research helpful information about moving to a city. I was mainly responsible for the UI/UX. Assisted in the implementation of Firebase authentication and API integration.

EDUCATION

UCLA Extension	UCLA Full Stack Development Course	Sept 2016 - April 2017
University of Southern California	B.A. Economics	August 2009 - June 2013
